Work Experience

MERN Stack Developer (Full Stack & AI Engineer) Dec 2024 – Sep 2026

Codegnan IT Solutions Pvt Ltd, Hyderabad, India — Lead architect across 5 live production platforms: codegnanedge.com • academy.codegnanedge.com • corporaterelations.codegnan.ai • placements.codegnan.com • codegnan.com

- **Enterprise LMS Scale:** Scaled a microservices LMS to 5,000+ users and 500+ concurrent students at 99.9% uptime by architecting 156 REST endpoints and ~24 data models as lead backend engineer (97% of commits). Live: academy.codegnanedge.com, codegnanedge.com.
- **Database Performance, 200x Speedup:** Cut student-record query latency 200x (20s to 100ms) by replacing unindexed table scans with compound indexes and aggregation pipelines.
- **API Latency & Payload Tuning:** Reduced average API latency from 1s to 40–50ms and shrank mobile JSON payloads by 75%+ by adding field projections and lean query schemas to core endpoints.
- **LiveKit WebRTC & Voice Infrastructure:** Achieved ~650ms conversational latency for automated mock interviews by deploying LiveKit WebRTC room management and audio streaming with the AI lead (corporaterelations.codegnan.ai).
- **Model Deployment & FastAPI Services:** Enabled self-hosted AI features across MERN dashboards by deploying open-source STT, LLM, and TTS models behind async FastAPI endpoints and guiding team integration.
- **Video Streaming & Cloud Storage:** Cut server CPU 40% and eliminated video buffering by moving uploads to direct-to-S3 presigned URLs and streaming through TPStreams HLS adaptive bitrate.
- **Placement & Screening Portal:** Delivered the live placement and candidate-screening platform as lead architect (placements.codegnan.com).
- **Payment & Checkout Automation:** Saved 15+ manual hours weekly with 0 duplicate charges by building Razorpay checkout flows (full, token, balance) with SHA-256 signature verification and idempotency keys, and automating Zoho billing (codegnan.com).
- **Security & Quality Gates:** Passed SonarQube quality gates across 246 PRs at 80%+ test coverage by writing Vitest suites, and secured 40+ endpoints with 5-tier RBAC, JWT, and httpOnly refresh cookies.

Notable Projects

Autonomous Career Intelligence & Portal Automation Engine

Python 3.11, Playwright, BeautifulSoup4, Requests, Node.js, openpyxl
github.com/somanisuryateja/surya-powerful-job-match-engine

- Automated job discovery across 5 enterprise career portals (Workday, SuccessFactors, Oracle CX, Avature, Amazon) by architecting a modular Adapter-Pattern engine with Playwright headless scrapers.
- Prioritized opportunities into APPLY / WATCH / NEAR / SKIP tiers by implementing a matching algorithm with automated Excel synchronization and dynamic HTML dashboard generation.
